

Illini Health Coalition

Mission Statement:

To promote and organize Health efforts on campus Illini Health Coalition was formed with the environmental approach to health education in mind. The environmental approach is just a fancy way of saying that in order to effectively impact student's health, a comprehensive, collaborative approach must be taken. So, with that in mind and with an understanding that students are the experts on student health and have the answers about how to influence student health, IHC was formed.

IHC = Environmental Approach +
Student-driven Initiative

If someone would like to get involved in Illini health Coalition they can email illinihc@hotmail.com with their interest in the club.
